

## Join the FocusHTG Registry!

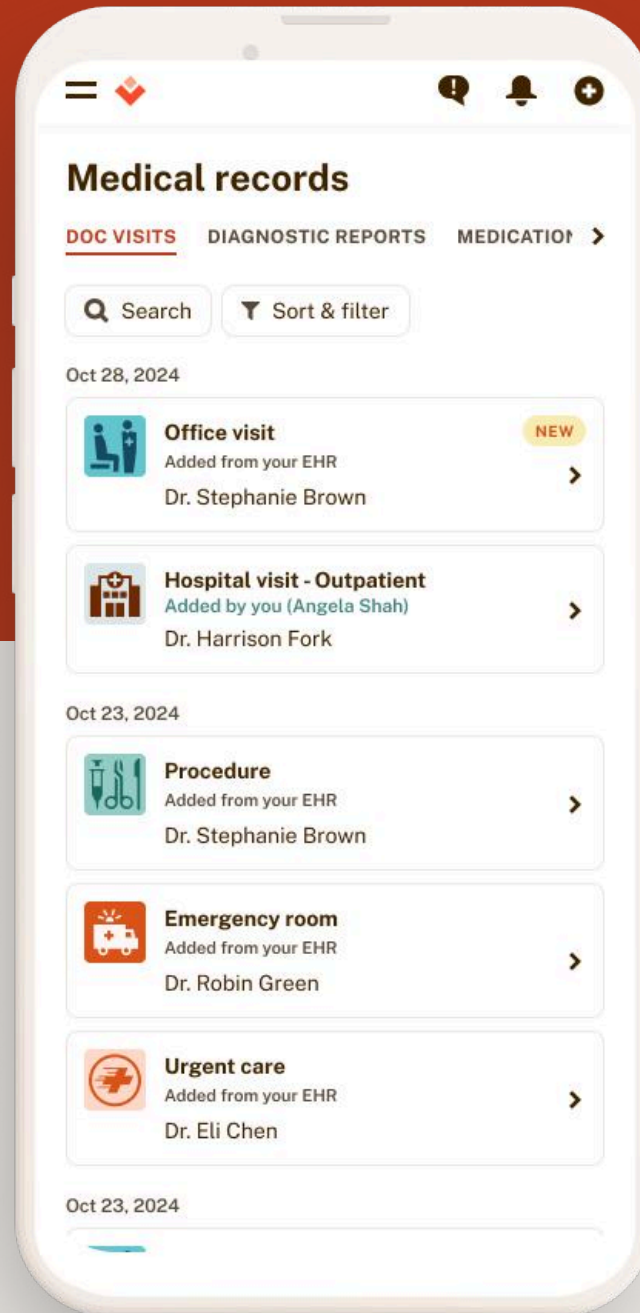

**Help make a difference in the lives of patients with very high triglycerides.**

Novellia and Ionis will be implementing **The FocusHTG Registry**, an observational study harnessing anonymized medical record data and surveys to learn more about FCS and sHTG. The registry aims to:

- Enhance the understanding of the burden of your condition
- Identify outcomes associated with very high triglycerides
- Understand the quality of life of those living with very high triglycerides
- Support the development of new medicines for the management of very high triglycerides

Sponsored by  
**IONIS**

In partnership with  
 **novellia**

Above medical record is fictitious and not based on real patient or healthcare providers

## About The FocusHTG Registry

### How will Novellia help me?

1. Centralize your health records in one place
2. Keep your medical records up-to-date
3. A “personal health encyclopedia” that can give you peace of mind during emergencies
4. Easily share info with doctors and family

### Who can participate in the FocusHTG Registry?

All of the following must apply to you:

- Adult 18 years of age or older
- Ever diagnosed with FCS or sHTG by a physician
  - OR ever had 2 or more triglyceride lab values  $\geq 500$  mg/dL
- US resident
- Able to complete registry questionnaires
- Able to provide informed consent and authorization to access your EMR data
